Authors

Carter L. Horney, a recognized authority on microprocessor and DSP implementation in telecommunications. Mr. Horney is an independent consultant and Forward Concepts Associate specializing in semiconductor product strategy and market planning. He was formerly Division Planner for Rockwell International's Digital Communications Division and earlier Strategic Marketing manager for Rockwell's Semiconductor Products Division. Mr. Horney was responsible for the product planning, which led Rockwell (now Conexant Systems) to dominate the worldwide FAX and high-speed modem chip market. He was appointed a Rockwell Engineering Fellow and received many commendations for outstanding achievement in Computer Architecture, Engineering, Technical Marketing, Product Planning and Customer Relations. Mr. Horney has a B.S. in Mathematics and Physics and an M.S. in Mathematics from Western Illinois University.

Satish Menon is an independent consultant and Forward Concepts Associate specializing in communications electronics. Most recently, Satish was Chief Technology Officer for a facilities-based provider of wholesale and retail voice telecommunication services where he architected a distributed, high-availability voice network that unified several circuit-based and packet-based protocols into a single packet-core network based on SIP protocol. Prior to this, he was founder and VP Product Development for Nuntius Systems, Inc. where he was responsible for all engineering activities that included activities involving voice codecs, GSM/GPRS/EDGE baseband/MAC, DSP based lower-power Wi-Fi baseband/MAC and multimedia codecs. Mr. Menon led a multi-disciplinary team of over 120 engineers and was responsible for building several successful products from concept to completion, over a seven year period. His background includes product management in areas of wireless technology and platforms, real-time embedded systems, DSP implementations of wired/wireless technology and communication protocol stacks along with product positioning and strategic planning expertise. Mr. Menon has also consulted with several high-tech companies in the areas of communication and multimedia technology. He earned his Bachelor's degree in Electronics and Communication Engineering from REC, Trichy, India and his Master's degree in Computer Engineering from University of Southern California.
